

Natural Form[®] Zone Air

Natural Form[®] Visco

Natural Form[®] Gel

Natural Form[®] Zone Air

The wheelchair cushion that combines superb skin protection and shape matching ability. The Zone Air design allows for improved position and function while maintaining optimal immersion and envelopment of both the ischial tuberosities and greater trochanters. The Zone Air shape fitting cushion provides critical pressure redistribution around the pelvis area providing the superior skin protection that the Natural Form brand is known for. Simply adjust the cushion's shape in order to minimize tissue deformation and maximize blood flow. With a fluid proof, vapor permeable SoFleece III cover that can be removed and laundered, the Zone Air cushion provides an optimal seat surface for the patient and caregiver alike.

Natural Form[®] Visco

The Natural Form Visco Elastic wheelchair cushion provides true pressure redistribution to maximize comfort and aid in the prevention of pressure ulcers. Designed to treat the sensate, geriatric or CVA rehab patient, the Natural Form Visco cushion combines a 2" layer of memory foam, sitting on a 1" layer that aides in postural support. Covered by a DermaPlush antimicrobial, vapor permeable cover that can be removed for laundering the Visco cushion is an excellent choice for the high risk patient needing equalized distribution of body weight while maintaining stability.

Natural Form[®] Gel

The Natural Form Gel cushion, featuring a segmented gel-filled bladder does not allow gel to migrate away from bony prominences where the user needs protection most. In combination with the two soft foam layers that surround it, the gel maximizes immersion to provide excellent pressure reduction and pain relief for those at moderate risk of pressure ulcers. Perfect for use in home or facility, the Natural Form Gel cushion is available in several standard sizes, including 19 x 19 to fit geri-chairs. Total cushion height is 2.5".

SoFleece III Cover

- 100% denier polyester swiss pique fabric
- Fluid proof with low vapor transmission
- Antimicrobial and antifungal
- Non-skid bottom surface
- Removable and Launderable

Top Foam Layer

- 1" top layer foam
- Soft and allows easy air passage
- Inner liner (not shown) top double knit and fiber band bottom surrounds top layer and the Zone Air layer secured by velcro straps
