The XL 7000

42" capable 450lb capacity low bed
Looking for that entry level bed pricing but don't want the minimalist features associated with the cost? The XL7000 is the solution to your problems. Sustaining a 450lb weight capacity and an optional 42" expandable deck, the XL7000 shares all the basic features of its sister bed the XL4000.

The comparison ends there as the XL7000 moves up a notch offering elements commonly found only on more expensive beds. An advanced caster locking system is employed for one touch operation. Other premium options include the ability for embedded staff control and a battery backup system.
